

1. In this phase we are going to use a new DA method which are introduced in this [paper](#) which proved a huge performance in accuracy in text segmentation and it has a [github](#)

2. Here we are use the same concept you used in your paper but we will change a small thing in the word expansion (if it's applicable for translated tweeted from arabic to english)

3. We are going to use knowledge Base expansion using new KB introduce in this [paper](#) which they are ConceptNet and SWOS
